

Dear Sir/ Madam,

Further to the very engrossing meet that we had on 30.9.08, I have further some more points to add, with your kind permission.

1 Identifying technologies- the compendium that constitutes the word ' technology'. I am a votary for the massification of the radio because of its accessibility, economic viability, and its resurgence in the form of FM Radio, and community radio.

2 Using 'appropriate' technology visa vis the social and economic factors.

3 Understanding the educational import of technology, making it at the same time creative and interesting for children- ' edutainment'.

4 Viewing technologies as a means to innovative ends and not an end in itself.

5 Infusing into teachers the concept of Free Open Source Software (FOSS), and its usage- in short open access.

Let me add that the round table was a wonderful learning experience for me, and I thank you for giving me an opportunity to attend it.

With Regards,

A.S.Guha
